Science of Stillness

Superconductivity (1911)

Superfluidity (1937)

At the atomic level, heat is the speed atoms move.

E.G. the heat in a scalding cup of coffee is caused by the atoms moving at a faster rate than the comparatively slower atoms in a cold coffee.

Atoms will move slower as the environment becomes colder, coming to a complete standstill at absolute zero (0° Kelvin, or -273.25° Celsius).

Superconductivity discovered in 1911.

Requires VERY COLD temperatures (-196°C).

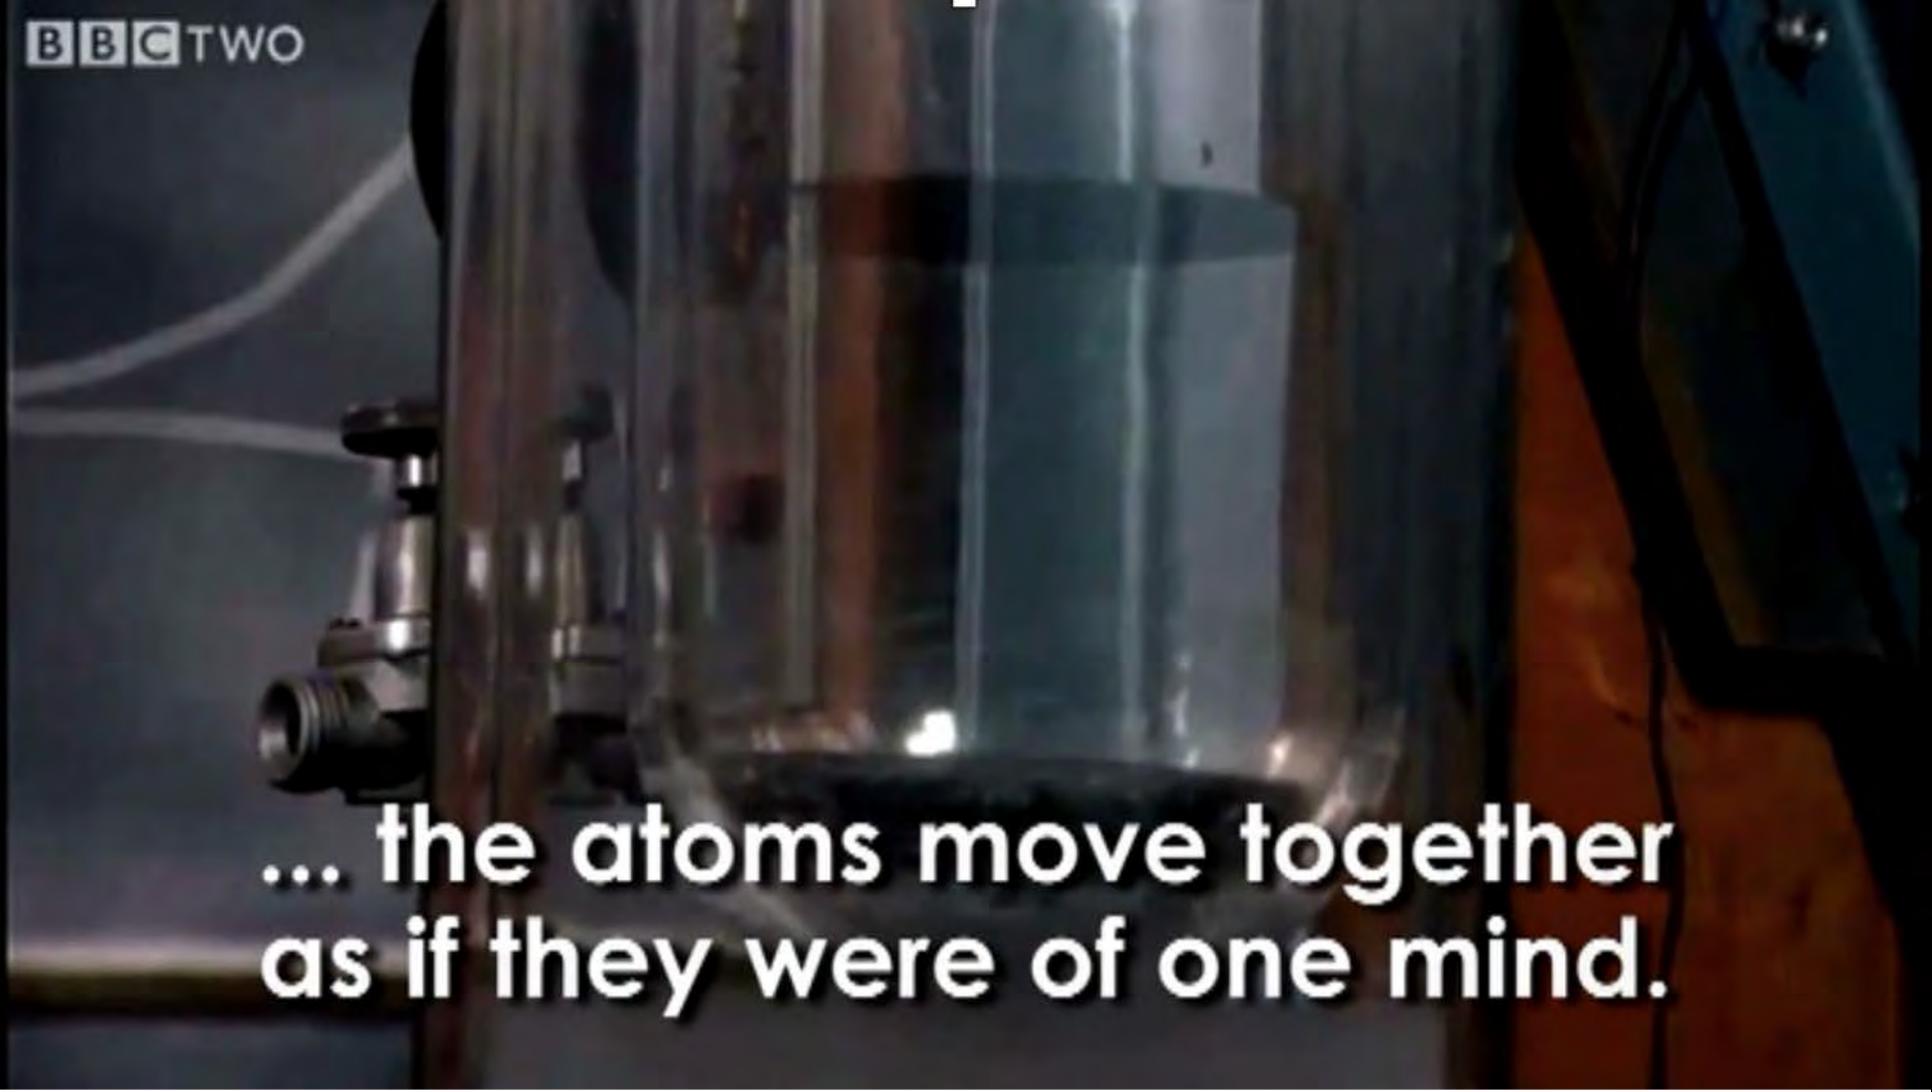

Atoms become MORE STILL with colder temperatures.

"What is One Degree", Ben Miller BBC2

Superfluidity

-270.98 ° C

(Atoms becoming very still.)

A close-up shot of a glass container, likely a vacuum chamber or a cryostat, containing a liquid. The container is part of a larger scientific apparatus with various pipes and valves. The lighting is dramatic, with a strong light source from the bottom left creating a bright reflection on the liquid surface and highlighting the metallic components of the apparatus. The background is dark and out of focus.

... the atoms move together
as if they were of one mind.

How life works?

There is a systematic plan of evolution, involving everything and everyone contained in our solar system, with a definite intelligent goal in mind.

From Autobiography (In Development) by Anatole Kononewsky

How life works?

There is a specific method, laid down through the ages, of shortening this plan, so that by a conscious effort we may progress more directly towards that goal.

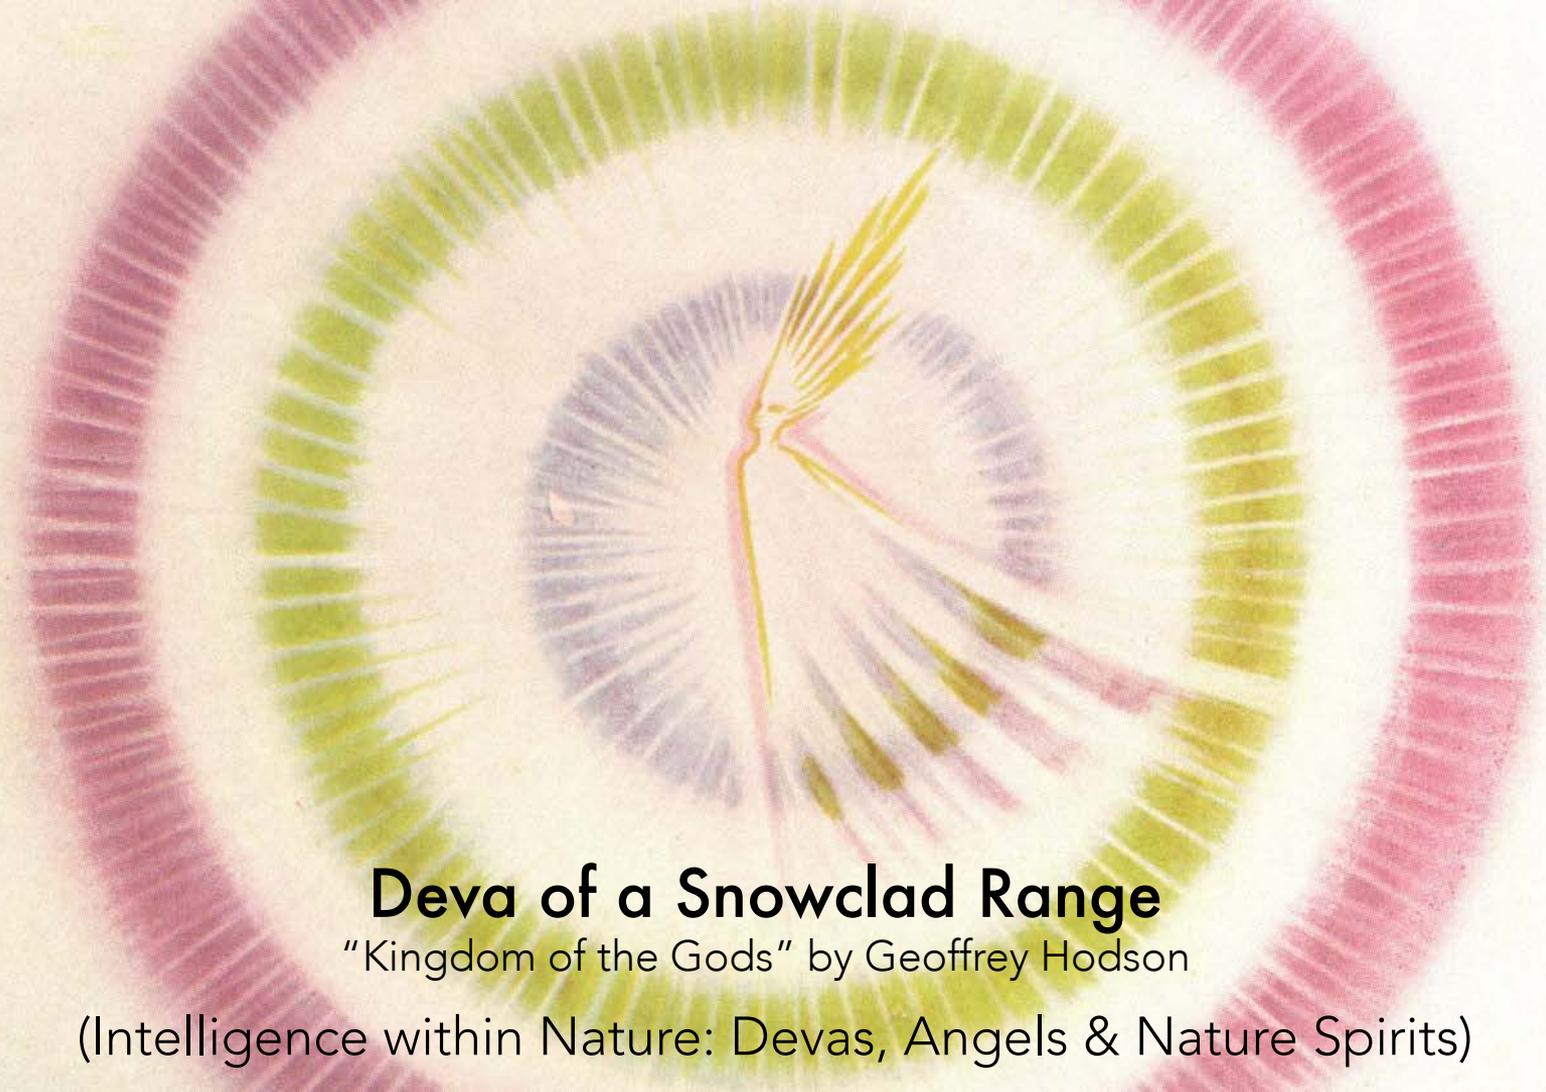

How life works?

This method asserts we need not trust to blind faith, but that we have within us latent powers, which when aroused, enable us to see and examine for ourselves the truth.

How life works?

This method also proves its case by showing how these powers can be awakened within us. This awakening is fundamental to the initiation of the superhuman evolutionary process.

Once initiated, unfold in conscious cooperation with the intelligence within nature.

Intelligence of the Heart

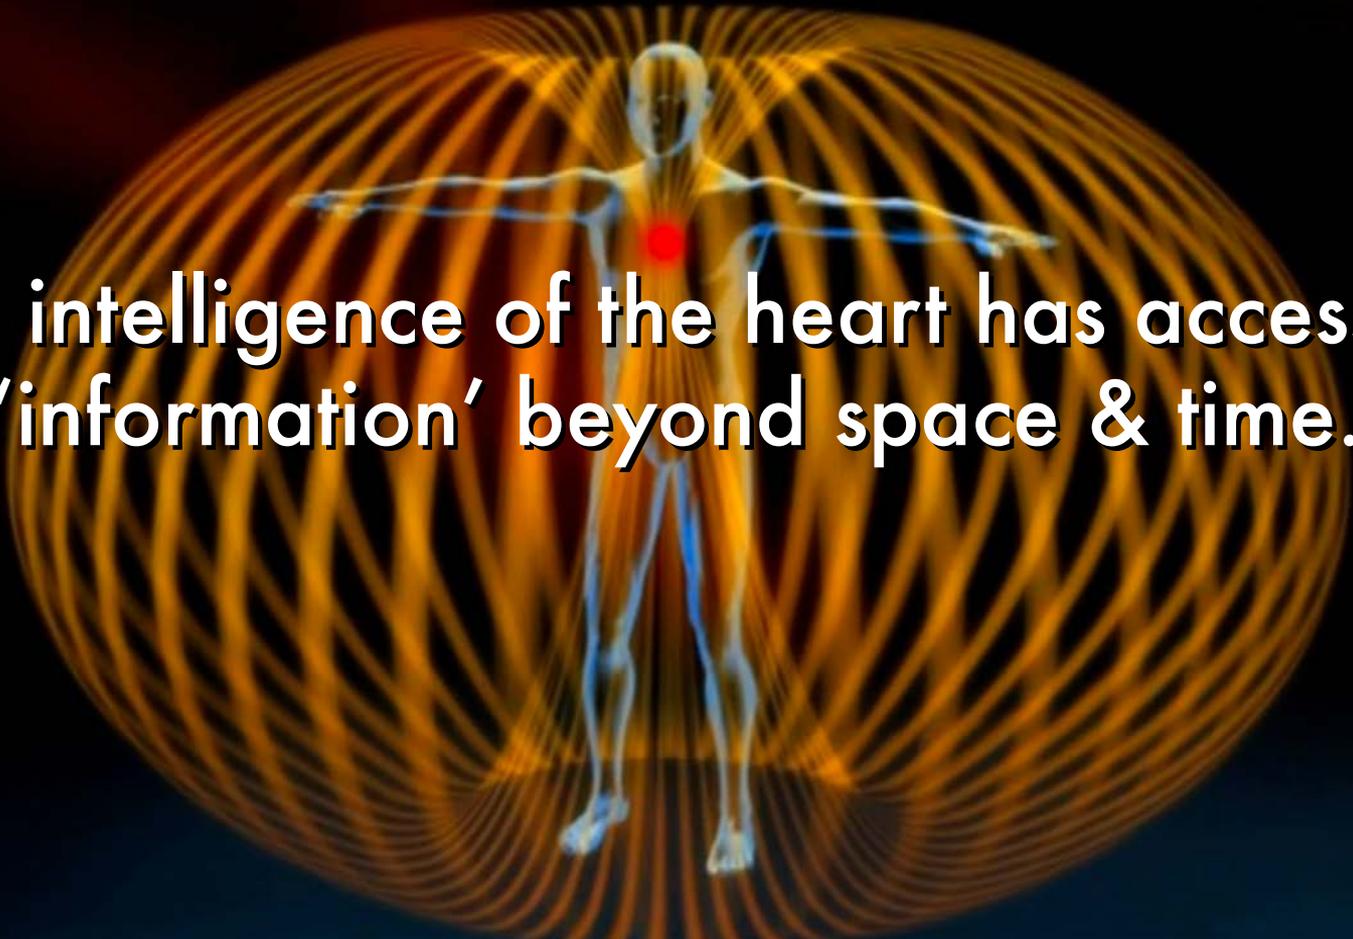

The heart is in control of the brain and has a central role in monitoring our emotional state.

A human figure is shown in a light blue, semi-transparent style, standing with arms outstretched. The figure is surrounded by a dense field of concentric, glowing orange lines that form a large, roughly spherical shape around the body. The lines are more densely packed near the center and become more sparse towards the edges. The background is dark, with a gradient from black at the top to a dark blue at the bottom.

Inspired Intuitive Intelligence

A human figure is shown in a light blue, semi-transparent style, standing with arms outstretched. The heart is highlighted in a bright red color. Surrounding the figure are numerous concentric, glowing orange lines that form a spherical pattern, resembling energy waves or a field. The background is dark, with a gradient from black to a deep blue at the bottom.

**The intelligence of the heart has access
to 'information' beyond space & time.**

A human figure is shown from the waist up, with a glowing red heart in the center of the chest. The figure is surrounded by a series of concentric, glowing orange and yellow waves that emanate from the heart, creating a sense of energy and vibration. The background is dark, making the glowing elements stand out.

The intelligence of the heart has access to 'information' beyond space & time.

"The heart is, in fact, a highly complex information-processing center with its own functional brain, commonly called the heart brain, that communicates with and influences the cranial brain via the nervous system, hormonal system and other pathways."

A vibrant sunset scene with a large rock formation in the foreground. The sun is low on the horizon, creating a bright glow and lens flare. The sky is filled with orange and red clouds. The foreground is dark, showing the silhouette of the rock formation and some vegetation.

*Inspired by the Power of Intuition
& the Intelligence of the Heart.*

The musician had composed a special song for this sacred site at the heart of Australia as an offering to the Indigenous Aboriginal community. It was composed as a sign of respect for the oldest, continuous living culture on the planet.

Our physical bodies have seven main chakras.

Planet Earth also has seven major chakra centres to function as a conscious, vibrant, living entity.

Uluru is regarded as the third Earth Chakra centre.

Its global function is to maintain the vitality of Earth and all living species.

So the Musician and Dancer started their
journey to the heart of Australia.

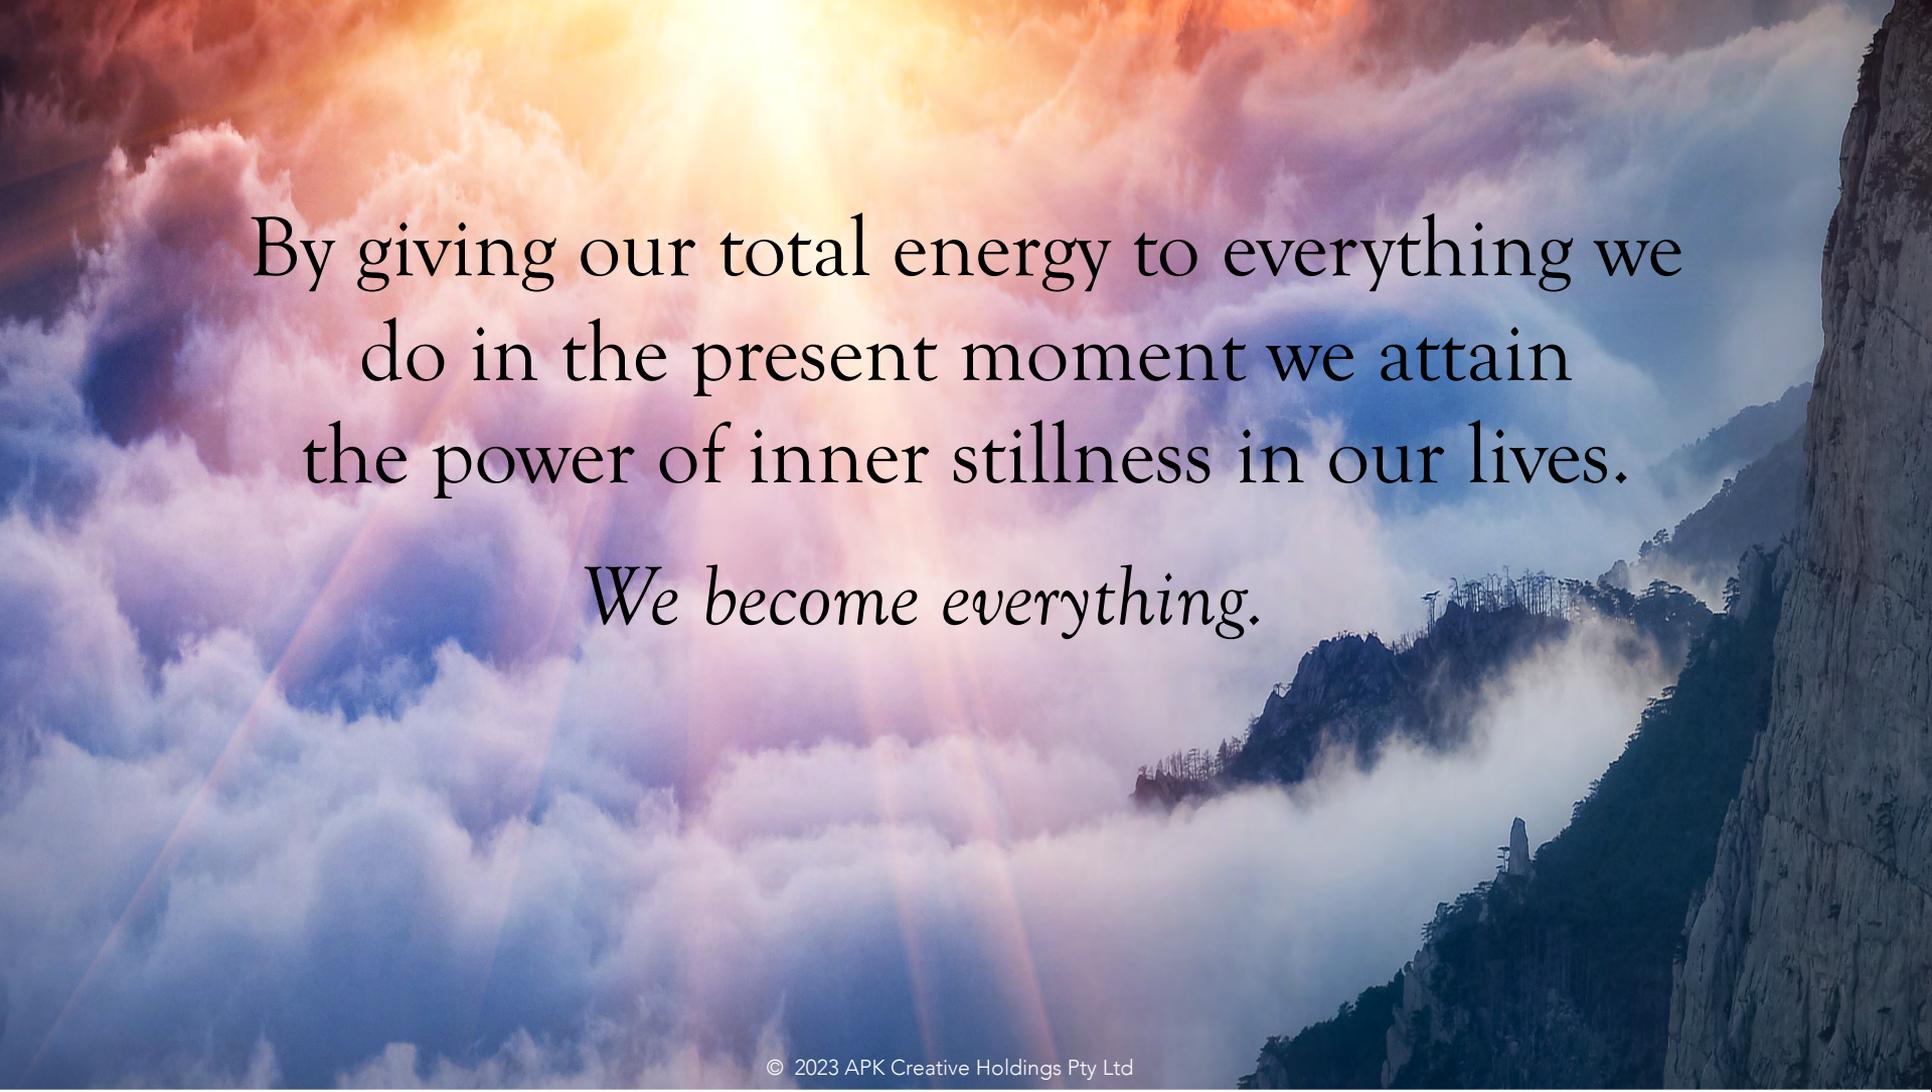

A large, reddish-brown rock formation, Uluru, is shown under a clear blue sky with the sun low on the horizon, creating a warm, golden glow. The foreground is filled with dry, yellowish-brown grasses.

It honours the sacred centre of Uluru – the heart of Australia within everyone of us.

Uluru is a living cultural landscape considered sacred to the Yankunytjatjara and Pitjantjatjara people.

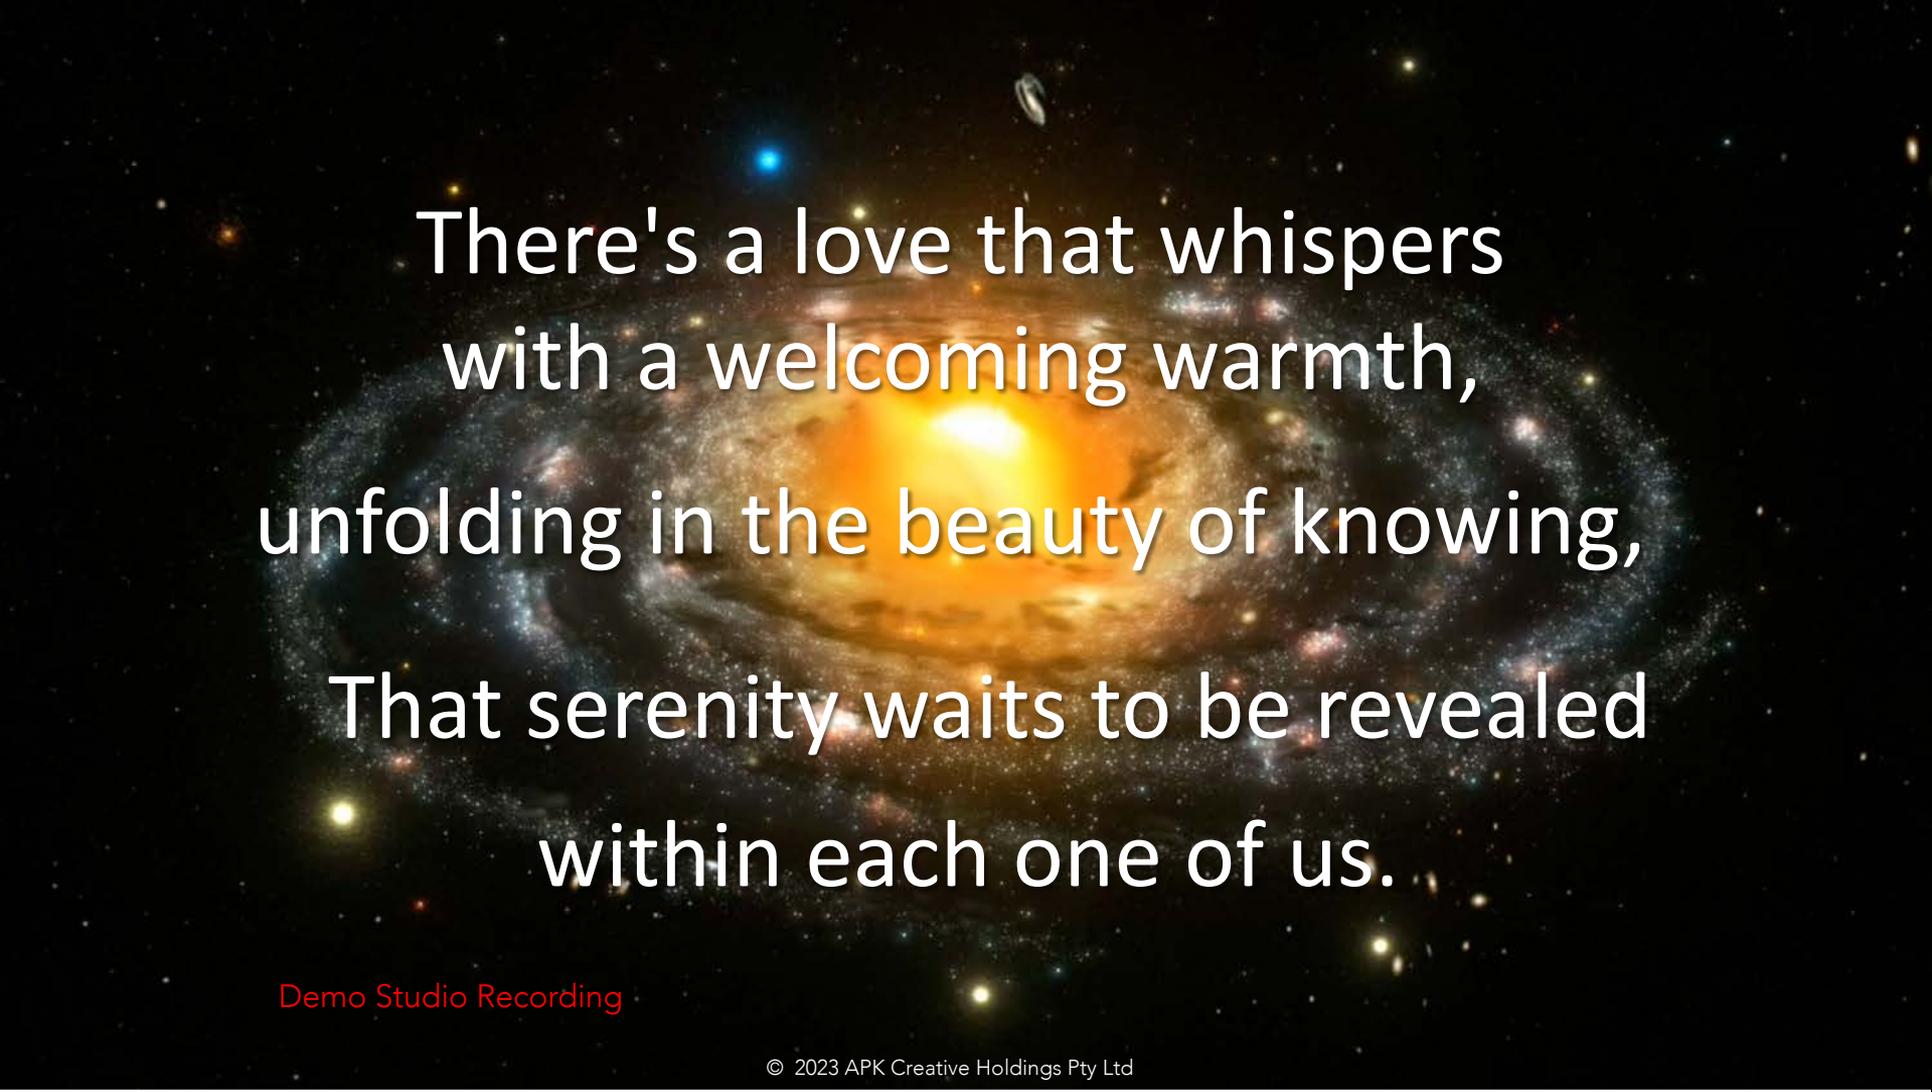

The Heart of Australia.

By giving our total energy to everything we
do in the present moment we attain
the power of inner stillness in our lives.

We become everything.

There's a love that whispers
with a welcoming warmth,
unfolding in the beauty of knowing,
That serenity waits to be revealed
within each one of us.

How it Started?

Initiative (1990) & Documentary (1993)

Launched in Melbourne

Celebrating the 30th Anniversary (2023)

Before it's Too Late Project

The "Before it's Too Late" project was implemented between 1990 and 1995. It supported many leading edge groups, in particular the Lighthouse Foundation, founded by Susan Barton AO. During that time there were many major events held in Melbourne & Sydney. A documentary was produced called, *"Our Children's Future in our Hands,"* (distributed to schools around Australia, including a Manual for teachers); the project generated awareness through national TV, with Max Walker and Robert Kiyosaki as the Spokespersons.

The project also channelled human and material resources to youth support groups. It created educational programs for empowering Youth Groups including a major "Success Congress for Teens" in Sydney, which was supported by leading sports and entertainment celebrities.

The Project and the video received wide acknowledgment within the community. This has included many Government officials and celebrities, who commented:

"It is pleasing to see your efforts in this regard. I wish you well in your continuing efforts for young people...", The Honourable Vin Heffernan.

"The 'Before it's Too Late' project is important to help young people in a positive way." The Honourable Michael John.

Documentary Released Melbourne (1993)

The "Before it's Too Late" initiative was implemented in 1990.

It supported many leading edge groups, in particular the Lighthouse Foundation, founded by Susan Barton AM.

During that time there were many major events held in Melbourne & Sydney.

The documentary, "Our Children's Future in our Hands," was produced and was distributed to schools around Australia, including a Manual for teachers.

The project generated awareness through national TV, with Max Walker and Robert Kiyosaki as the Spokespersons.

The project also channelled human and material resources to youth support groups.

It created educational programs for empowering Youth Groups including a major “Success Congress for Teens” in Sydney, which was supported by leading sports and entertainment celebrities.

The legacy of the initiative lives on via our support of the great work of the Lighthouse Foundation, based in Melbourne.

'SEE WHAT WE CAN BE'

*'Can't you see, what we need, is some love,
just to see what we can be.'*

*'If you look up above to see what is love,
in a little child's eyes is just where it lies.*

*It's time that we took some time for a look,
just to see what is real and really makes us feel.*

*Now you can wait, just for fate, but I'd
rather make a move before it's just too late.'*

Jerry Speiser (drummer from "Men at Work") helped to produce the demo recording in Melbourne as a guide-track for the Fitzroy Community School Choir who performed the song at the launch in 1993.

More than a Song...

An anthem for all Australians.

I found home...

A vibrant sunset over a calm ocean. The sun is a bright yellow orb on the horizon, casting a shimmering golden path of light across the water. The sky is filled with soft, colorful clouds in shades of orange, pink, and purple, with rays of light breaking through. The overall mood is peaceful and awe-inspiring.

“Where the beauty of these ancient lands sings into my soul.”

A close-up photograph of two hands, one from the left and one from the right, positioned to form a heart shape. The hands are cupped together, with the fingers pointing towards the center. The background is a soft, warm sunset or sunrise over a body of water, with a bright sun low on the horizon creating a lens flare effect. The overall color palette is dominated by warm oranges, yellows, and reds.

Unites us all.
